

L (Luxury) Series Fabric Technical Information

Advaning awning acrylic fabric offers an aesthetic softness and feel all its own. Advaning high quality acrylics are very resistant to UV light, mildew and water. The properties of acrylic fabric allow it to be highly breathable, so hot air and moisture will not be trapped. Acrylic fabric is extremely water repellent.

The Advaning L (Luxury) Series comes with European Recasens® Recacril® 100% solution dyed (Higher Quality) acrylic fabric. This means that color pigments are added to the acrylic fibers while the fibers are in a semi-liquid state. As a result, the color becomes an integral part of the fiber, and won't wash out.

Fabric Type

Name of Fabric	Recacril®
Base Fabric	100% Solution Dyed Acrylic

Characteristics

Weight	9 oz./sq yd ± 5%
Finish	Anti-stain, rot-proof and water repellent

Specifications

	Test Results		Test Method
UV Resistance	1500 + hours		AATCC-16
Abrasion Rating	40,000 Rubs		ASTM-4157
Hydrostatic	40.6 cm		AATCC-127 Method B
Puncture Strength	38 lbs		ASTM-751
	Warp	Fill	Test Method
Tear Strength	11.5 lbs	7.7 lbs	ASTM D-2261
Tensile Strength	287 lbs	149 lbs	ASTM D-5034 Grab
Stretch / Shrinkage	0 / 0.001	0 / 0	ASTM D-2594 / Method 5804
